ELIXIR STRINGS

Elixir® Strings last 3-5 times longer than ordinary strings without compromising tone.
This means you buy fewer sets of strings, change them less often, and trust your guitar is ready to go whenever you are.
Coating prevents contamination and corrosion from collecting in the windings of the strings.

AQUILA NYLGUT UKULELE STRINGS

A fundamental aim of our research has been to make a new synthetic product having the same acoustic properties as gut - but without its typical defects (high cost, limited duration and high instability under varying climatic).

Red Series® sets provide performance over traditional strings for musicians who love clear, sharp sound and powerful voicing across the full scale of the instrument. The strings also maintain their intonation better.

The **Lava Series®** ukulele strings are a **grey-black** string colored with a touch of **mother-of-pearl.** These strings maintain the same identical mechanical and sound properties of our famous white-pearl **Super Nylgut®** ukulele strings.

GORILLA TIPS

IMPORTANT!
For proper fit, first determine your finger size.

1. Wrap a paper strip or string around the first joint of your **index** finger and mark at overlap.
2. Measure the length from end to the mark.
3. Compare the measurement to determine best size fit.
   1½" - 1¾" (38-44mm) or less choose **XSmall**
   1¾" - 2" (44-51mm) or less choose **Small**
   2" - 2¼" (51-57mm) or less choose **Medium**
   2¼" (38-44mm) or greater choose **Large**

K Zildjian cymbals are known for their dark, warm sounds that harken back to the original K cymbals developed by Zildjian in 19th Century Turkey. Instantly recognizable by their "vented K" Logo, K cymbals capture the aura of original Ks but with far greater consistency, making them the choice of drummers from a variety of different genres such as Jazz, Country and Rock.

The legendary "K Con" is the pinnacle of the Zildjian cymbal line, renowned for its perfectly blended sound quality. Complex hammering contributes to the cymbal's unique sonic identity and dark tones that can be at once cutting and smooth. Made in small batches using a 14-step process, every K Constantinople has its own signature voice.

The Kerope line draws from Zildjian's rich history and cymbal-making expertise to bring forth the most authentic vintage K recreation to date and look as they sound - dark and complex. Named in honor of Kerope Zildjian, each cymbal is meticulously hand-crafted and represents the best of everything we have learned in 390+ years of cymbal making.

K Custom cymbals are based on the darker, dryer sounds of the legendary K Line but have been customized with unique finishes, tonal modifications and manufacturung techniques. The combination of K hammering & a variety of modern hammering techniques have made K Custom on of Zildjian's most popular lines & the choice of artists from a wide variety of genres.

Reminiscent of cymbals from the '30s through the '60', yet distinctly modern & relevant for today's music, the A Avedis collection is a vintage recreation of the timeless sound and feel heard and played on thousands of top hits throughout the 20th century. Named in honor of Avedis Zildjian III, the father of the modern American cymbal, this collection is thin & loose, with a played-in feel & immense musicality. Each cymbal features a patina finish that reproduces the look of a decades-old cymbal.

Recognized by their striking brilliant finish, A Custom cymbals feature unique tonal grooves and lower profiles. Together, these attributes produce a smoother, glassier and brighter sounding cymbal with more give when struck. It is these qualities that have made the sound of A Customs particularly sought after in the studio.

Zildjian's classic sound is embodied by A Zildjian and immortalized in countless recordings by the greatest drummers of all time. Known for their versatility, these bright cymbals range from paper thin and delicate to extra heavy and cutting, producing crashes, rides, and hats that reflect today's musical styles.

Taking its name from Ilham — the Turkish word for inspiration — the I Family is an inspiring line of cymbals in both name & design. Crafted from B8 alloy (92% copper, 8% tin), I Family cymbals feature thinner weights that deliver washier and more emotive sounds as well as alternative sound options like trash crashes and mastersound hihats.

The L80 Low Volume Series is a playing experience that delivers a quieter sound without losing the authentic feel of a full-volume cymbal. The L80 Low Volume cymbal is up to 80% quieter than a traditional cymbal and is the perfect solution for practice spaces, small drum lesson rooms, low volume gigs or anywhere you want to play hard, but not loud.

S cymbals a modern cymbal voice that redefines what a B12 alloy (88% copper, 12% tin) can deliver. This versatile collection is bold, bright and dynamic; with balanced frequency response, making it suitable for a variety of musical styles. Each model features extensive hammering and lathing, as well as a striking brilliant finish that helps open the sound, providing a bright and shimmering tone.

Your journey of musical expression starts with Planet Z - a newly redesigned line of cymbals made for drummers looking for bright, cutting tones with a more controlled and focused sound. Like all Zildjian cymbals, Planet Z is proudly crafted in the USA.

After a 15-year hiatus, the coveted Z Custom cymbal series has returned to the Zildjian portfolio, addressing Metal's growing worldwide popularity, delivering explosive, bright and loud sounds that drummers have been requesting for years, with reimagined durability. Built for the stage or studio, allowing for limitless musical expression.

EVANS DRUMHEADS

GENERA SNARE

Designed with a single ply of coated 10mil film and a 2mil overtone control ring - all the sensitivity and responsiveness of a single ply, eliminating excessive overtones and controlling sustain. Has a balanced attack, short sustain and moderately dark tone.

B13GEN 13”..... **$40.70** **B14GEN** 14”..... **$43.20**

GENERA DRY SNARE

Made with a single ply of coated 10mil film, a 2mil overtone control ring, and precision-drilled dry vents, this head reponds like a single ply while eliminating any lingering overtones. Provides a balanced attack, short sustain and dark tone.

B12DRY 12”..... **$37.75**
B13DRY 13”..... **40.70**
B14DRY 14”..... **43.20**

HD (Heavy Duty) SNARE

Made w/ a coated outer ply of 5mil film & an inner ply of 7.5mil film, plus a 2mil control ring on the underside of the head, damping excessive overtones just enough to balance your sound. Heads have slightly more defined attack, short sustain & moderately bright tone.

B13HD 13”..... **$51.50** **B14HD** 14”..... **$53.60**

HD DRY SNARE

Same as the Evans HD Snare plus precision-drilled dry vents around the perimeter that provide advanced overtone control. Has a semi-defined attack, with short sustain & a bit less brightness than the standard HD heads.

SNARE SIDE CLEAR

The 2 mil Clear 200 snare side will enhance sensitivity for softer dynamics and brushwork. The Snare Side 300 is Evans' most versatile snare side head. The 3mil film yields a wide dynamic range & controlled snare response at all dynamic levels. The 5mil Clear 500 snare side produces a dark, throaty sound.

EVANS TIMPANI DRUMHEADS

ORCHESTRAL TIMPANI HEADS

To satisfy the most discerning orchestral percussionist, we settled on a pretensioned head. In fact, this head has a higher degree of pretension than any other synthetic head currently available. A powder-coated steel insert ring delivers the desired effect when pedaled and affords additional support once the head is under tension. They will perform magnificently at pianissimo with soft mallets, yet will not break up or sound harsh under the stress of triple forte. It sustains when asked and mutes softly and quietly with the palm and fingers. Through all this, it retains definite pitch.

AQUARIAN DRUMHEADS

PERFORMANCE II™ SERIES

2-ply, head manufactured with Aquarian's Vacuum Tuned process which eliminates air bubbles and wrinkles between the two plies. The two 7mil plies are sealed only at the edges which tame unwanted overtones while focusing on the low frequencies. Designed for loose tuning to deliver a low, fat, punchy sound that was a big part of classic rock 'n roll records.

DEEP VINTAGE II™ SERIES

The Deep VIntage II presents an option for using deeper sounding heads on contemporary drums without the loss of resonance. The multi-ply Vacuum Tuning process eliminates dead air spots and adds depth and durability to these two 10mil plies. The slightly thicker vintage coating slows the vibration of the head and results in a lower, warmer tone and softer feel – bringing the truly authentic sound of traditional calfskin to the modern drums.

LP COWBELLS

BLACK BEAUTY™
Originally designed for Cha Cha, it is our most popular model. It's also very popular with rock drummers. Features the exclusive SONACURVE playing surface for maximum playing ease and volume.
LP204AN Black Beauty™, 5"..... **$67.75**
LP204B Deluxe Black Beauty™, 5"- Chrome **102.40**

A whole step lower in pitch than the Black Beauty, moderately dry sound & dynamic projection. 5½" mountable.
LP228 Black Beauty™ Sr **$83.50**

MAMBO
This bell has a unique "creased" playing surface for maximum playing ease and volume. Its use is similar to that of the LP205 Timbale Cowbell and is chosen where a deeper sound is desired.
LP229 Mambo Cowbell, 8½"..... **$83.50**

CITY COWBELL w/ Mount Pack
High-pitched, bright sound w/ a moderate overtone. Includes bass drum hoop clamp mount. Eyebolt fits any ⅜" rod.
LP20NYK City Cowbell, 5"..... **$58.80**

TRI-BELL SET
Reintroduced by popular demand, the Tri-Bells first emerged when the smallest bell was found in an antique shop and tuned to blend w/ the LP Tapon Bell and the larger Black Beauty Sr. Patented vice-mount & memory lock for rods from ⅜" to ½", with a cushioned mounting system to eliminate cross-talk. Bells can be removed from the bracket to fit ⅜" to ½" diameter rods for single cowbell use.
LP570 3", 4", 5½", Mountable, Black Finish.... **$238.00**

BONGO COWBELL
Produces a high pitch that perfectly complements the lower Timbale Bell in a traditional timbale set-up.
LP206A Bongo, 8"..... **$99.25**

TIMBALE COWBELL
A must for any timbale set-up. Produces a moderately dry, deep pitch that contrasts perfectly when paired with the Bongo Bell.
LP205 Timbale, 8½"..... **$80.35**

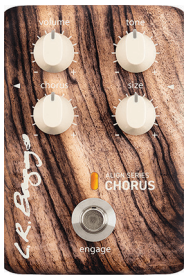
LR BAGGS ALIGN SERIES PEDALS

Acoustic Pedal Suite Crafted For The Acoustic Player

Designed specifically for acoustic instruments, preserving the original tone and layering the effects on top of your acoustic foundation.

ACTIVE DI
All-discrete active DI pedal uses the most pristine circuitry & is designed to preserve the authenticity of your sound while providing high headroom for a wide range of signals.
ASADIP **$255.00B**



CHORUS
With the purity of LR Baggs' circuitry and the effect in side chain, the Chorus adds fullness behind your guitar with any signal degradation & complements your guitar rather than placing the effect in the limelight.
ASCP..... **$285.00B**

DELAY
By expanding the range of your sonic profile while underlining your primary acoustic sound, the Delay augments both rhythm and melody for a larger dimensional sound & feel. Combined the most desirable qualities of both analog & digital circuitry
ASDP..... **$285.00B**

EQUALIZER
Based on the circuit of the estemmed Para Acoustic DI, the Alighn Equalizer combines our signature, high-graded FET gain staging with powerful tone-shaping 6-band EQ that injects richness and balance to any acoustic pickup signal.
ASEP..... **$285.00B**

REVERB
The circuit seamlessly integrates the wet & dry signals w/ the effect in side-chain with our pristine input & output circuitry so it never overwhelms the original signal. Tone control sweeps from warm & muted to open & present.
ASRP..... **$285.00B**

SESSION
Brings signature studio sound to your live rig. Session circuitry enhances your acoustic pickup & imparts the rich sonic character that you'd expect from an experienced audio engineer using top studio gear.

POWER SOLUTIONS

ISO-8U POWER SUPPLY
Provides 9V or 12V DC power for your pedals. Each output is isolated to remove ground loops. One output is adjustable from 4-9V to simulate a dying battery. 2 high power outputs can provide 250mA, all others provide up to 100mA A USB jack type A can provide high power charging up to 10 watts. Comes w/ a wide variety of cables to connect to your pedals.
ISO8U.....**$242.99B**

The ART PDS8u is a premium power distribution package for stage or studio. It has 8 AC outlets with opposing orientation ensuring easy access for AC Cables. Two AC outlets are spaced for large size 'wall wart' adaptors. 1.0 and 2.0 Amp USB ports are included for powering tablets, phones and other accessories.
PDS8U.....**$139.99B**

12V/48V PHANTOM PRO POWER SUPPLY
The Phantom II Pro provides phantom power for one or two condenser microphones. It has a 3-way 12V/OFF/48V selector switch which lets you choose 48V for microphones rated at 24 to 48V, 12V for lower-voltage microphones or "OFF" to conserve battery life. Low-noise operation is featured in all modes and can be used with an optional AC adapter.
PHANTOMII.....**$165.99**

COMPRESSOR/LIMITER

STEREO COMPRESSOR/LIMITER/GATE EXPANDER
A highly sophisticated and flexible dual channel dynamics processor. This unit can be adjusted to provide anything from smooth subtle compression to hard limiting. Noise reduction is provided by a fast solid gate or a subtle expander; selectable auto/manual Attack & Release.
SCL2.....**$328.99B**

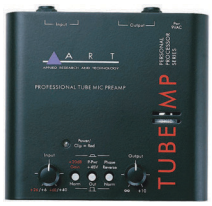
PREAMPS

TUBE PREAMPLIFIER SYSTEM
Designed as the ideal preamp for any application, the tube driven TPS II™ adds warmth & texture to any audio source. Two-channel high performance preamp uses a hand selected 12AX7A tube in the low noise input circuitry. This, coupled with ART's proprietary V3™ (Variable Valve Voicing) and variable input impedance allows the TPS II™ to deliver incredible performance from cost effective single space rackmount solutions.
TPSII.....**$492.99B**

DJ PRE II – PHONO PREAMP
The DJ PRE II is a high quality phono preamp designed for your home and studio. It acts as an interface between your turntable and your audio recording system. The analog input capacitance can be switched between 100pf and 200pf to optimize phono cartridge response. A switchable low cut filter removes rumble while leaving the audio pristine.
DJPRE2.....**$106.99**

USB DUAL PRE
Full-featured high quality dual portable preamplifier and computer interface. It is designed to work over a wide variety of applications from remote field recording to desktop studio tracking. Each of the two low noise input channels has up to 48 dB of clean gain with signal present and clip LED indicators. Inputs can be either XLR balanced or ¼" TRS. Each of the ¼" TRS outputs is buffered low impedance balanced. Flexible 3-way power from USB. External supply, or 9 volt battery. Includes USB cable – everything.
USBDPPS.....**$178.99B**

DUAL RP PREAMP
Two-channel remote preamp designed for dynamic and ribbon microphones. Add up to 28 dB of clean, low-noise gain - ideal for low-output mics. Offers impedance on both channels. Shortens up the distance between the mic and preamp. Runs on +48V phantom power. Also features a switchable high-pass filter on each channel that cuts low frequencies to remove rumble & tighten bass.
DRP.....**$113.99**



TUBE MP PRE AMP
External tube microphone preamp. The hybrid design of the Tube MP allows it to add warmth and fatness to a signal while maintaining exceptionally low-noise and high quality. While it's primary application is as a microphone preamp, the TubeMP is an exceptional direct box – impedance matching, amplifying and improving the sound of any instrument plugged into it.
TUBEMP.....**$185.99B**

TUBE MP STUDIOV3™ PRE AMP
Offers superior performance and a sound quality any 'onboard' preamps found in today's low-cost mixers and audio interface units aren't capable of delivering. Built with all of the professional input features required in recording or live sound applications, it uses a hand-selected 12AX7A tube in the signal path for maximum tone and gain.
TUBEMPSTV3.....**$270.99B**

TUBEMPPS

TUBE MP PROJECT SERIES
The ultra low noise discrete microphone preamp front end has an extremely flat and wide frequency response and can easily handle a wide range of input signal levels with a minimum of coloration. The fully adjustable input gain allows as little 'tube warmth' or as much 'tube drive' as required for any audio source.
TUBEMPPS.....**$249.99B**

With an integrated USB audio output, this Tube MP is designed for standalone digital recording. It's a convenient mobile solution when you're away from your primary interface, letting you connect to DAW to record a 16-bit signal at 44.1 or 48 kHz. It's otherwise identical to the standard Project Series model (TUBEMPPS).

The BTDI is designed to provide a reliable Bluetooth interface from computers, phones & legacy Bluetooth devices to any installation. Features a Bluetooth 5.0 receiver, external atenna for long-range operation, transformer isolated XLR outputs, etc.
BTDI **$279.99B**

AV DIRECT
Has stereo RCA, ⅛" & ¼" TRS line level inputs, as well as a ¼" & bare wire pressure clip speaker level inputs, transformer isolated XLR microphone level output a switchable 4.8Hz high cut filter, ground lift & variable level control.
AVDIBOX Audio/Video Direct Box..... **$149.99**

DUAL RE-AMPING DIRECT BOX
The Dual RDB is the ideal interface solution for any application where stereo or dual line signals from recording interfaces, computers, mixers, iPods, consumer audio or video machines need to be connected to XLR mic or ¼" instrument level outputs.
DUALRDB **$156.99**

XDIRECT™ ACTIVE DIRECT BOX
High quality interface that lets you connect instrument, line, or speaker level signals to any balanced input. Extremely wide, flat frequency response can handle high input signal levels while still maintaining an isolated, balanced low impedance output.
XDIRECT **$109.99**
DXDIRECT Dual XDirect™ **128.99**

ZDIRECT™ PASSIVE DIRECT BOX
High quality interface that lets you connect instrument, line, or speaker level signals to any balanced input. Extremely wide, flat frequency response can handle high input signal levels while still maintaining an isolated, balanced low impedance output.
ZDIRECT **$75.99**
DZDIRECT Dual ZDirect™ **85.99**

UTILITIES

DUAL TRANSFORMER/ISOLATOR
High quality passive audio interface that uses a pair of high performance transformers to totally separate input and output signal grounds, therby isolating two systems and reducing hum & ground-loop noise. The audio transformers have an extremely flat & wide frequency response & can handle high signal levels while an isolated balanced output.
DTI **$142.99**

CLEANBOX PRO
Dual Channel Level Converter
One part converts 2 channels of consumer-level unbalanced input signals into 2 channels of pro line-level balanced out signals. The other part converts 2 channels of line-level balanced signals into 2 channels of consumer unbalanced output signals.
CBPRO **$156.99**

A/B-Y BOXES

COOLSWITCH – A/B-Y SWITCH
The CoolSWITCH delivers full A/B-Y switching, plus parallel common in/out jacks. It lets you switch a common source signal (guitar, bass or keyboard) between 2 amplifiers or amp channels. It also allows you to switch 2 source signals (like two different guitars) into the same amplifier.
COOLSWITCH **$113.99**

COOLSWITCH PRO – ISOLATED A/B-Y SWITCH
A handy foot-operated box that lets you switch an instrument signal (guitar, bass or keyboard) to either of two amplifiers or amp channels, A or B. The "Y" function sends the signal to both the A & B outputs in parallel.
CSPRO **$156.99**

4 CHANNEL HEADPHONE AMP
The HeadAmp4 is a simple, cost effective solution for any studio requiring up to four additional channels of headphone amplification, each with individual volume control. Ideal for virtually any home or project studio.
HEADAMP4 ..... **$149.99**

SIX CHANNEL HEADPHONE AMP
A fully-featured six-channel stereo headphone amplifier that includes 6 auxiliary inputs to allow separate "more-me" mixes on each headphone channel. Each channel has a dual function Balance Control and includes one front and two rear panel stereo ¼" TRS headphone jacks.
HEADAMP6 ..... **$365.99B**

HEADAMP6 PRO
6 channels w/ separate bass & treble controls. Front panel, rear panel, or both front & rear panel outputs can be used simultaneously to drive headphones or be used as feeds to additional headphone amplifiers in a distributed audio network. Operates in Stereo, Mono (Source Left). Mono (Source Right) or Summed Mono (Source Left & Right).
HAMP6PRO **$478.99B**

MvMONITOR II
Blends any microphone, instrument and stereo source for personal monitoring. The microphone thru provides direct connection to any mixer and will pass phantom power from the board for powering condenser mics. Headphone output section has 1/8" & 1/4" jacks.
MYMII **$228.99**

HeadTAP – HEADPHONE TAP
This is a passive device w/ an input to connect the PA or monitor amplifier and an output to connect the headphones. The HeadTAP will also work w/ a stereo headphone amplifier for use in recording situations when you want to add headphones for additional performers.
HEADTAP **$120.99**

AMPLIFIERS

STUDIO LINEAR AMPLIFIER
The SLA-1 Studio Linear Amplifier is a robust yet compact power amplifier designed for studio or even select live applications. It has been designed and engineered to provide clean, quiet power and excellent sound with ultra-low noise and distortion.
SLA1 100 Watt **$429.99B**

STUDIO LINEAR AMPLIFIER
A studio linear power amplifier capable of delivering 200 watts per channel (8 ohms) with an incredible 10Hz to 40kHz frequency response. Compact single rackspace low noise linear design, the SLA-2 uses a solid steel chassis and toroidal transformer for added long term reliability.
SLA2 200 Watt **$649.00B**

STUDIO LINEAR AMPLIFIER
A true 4-channel amplifier in a single rack-space that can be switched easily from Multi-Channel, Stereo & Bridged Mono Modes. Delivers the clean power you need for any professional audio application including project or professional studio environments or commercial sound installations.
SLA4 4 x 140 Watt..... **$689.00B**

HVA SERIES 1 AMPLIFIER
A class-D installation amplifier that is suitable for 70/100V line operation. Each channel has its own gain control and LED indicators (signal, clip & protection). High current switching ower allowing high power output w/ low noise & low distortion.
HVA1 ..... **$929.99B**

IN-EAR PERSONAL MONITOR AMPLIFIER
A belt-worn, battery-powered, high-output headphone amplifier w/ a locking ¼"/XLR combo input jack, sturdy belt clip and output volume control.
HP1 ..... **$113.99**

EQs

DUAL 31-BAND GRAPHIC EQUALIZERS
Designed to pro use wherever you need a cost effective way to shape your sound. The rugged, all-steel constructed chassis is well suited for any live sound application.
EQ355 ..... **$413.99B**

2-WAY CROSSOVER w/ SUBWOOFER OUT
Employs 24dB/octave state-variable, Fourth-order Linkwitz-Riley filters that guarantee properly phased outputs at all frequencies.
CX311 ..... **$239.99B**

SPLITTERS/PATCH BAYS

EIGHT CHANNEL MIC SPLITTER
Can be used to split 8 balanced low impedance microphone signals into 16 balanced low impedance microphone signals (eight pairs). Each channel provides one direct output & one transformer isolated output from a single microphone. Passes phantom power from main mixer. Individual ground-lift on each channel.
S8 ..... **$570.99B**

S8 3WAY EIGHT CHANNEL
The S8-3Way eight channel three way microphone splitter is ideal for live sound, recording & broadcast applications where microphone & XLR balanced line level input signals have to go to multiple mix locations. One direct & two transformer isolated output per channel. Reversible rack ears for added system flexibility.
S83WAY **$599.99B**

SPLITCOM PRO – MIC SPLITTER/COMBINER
The SPLITComPro is an ideal audio utility to use in an application where you need to split a low impedance microphone signal to feed two separate mixers, or where it's necessary to combine balanced low impedance microphone signals from two mics into a single channel input.
SPLITCOM **$85.99**

P48 – 48 POINT BALLANCED PATCH BAY
A great solution for organizing cables while optimizing connectivity in any studio or live PA rack. Designed for maximum convenience, each pair or TRS ¼" balanced I/O can be configured for normal or half-normal operation.

CLARINET MOUTHPIECES

TRADITIONAL BEAK/PROFILE 88/13 SERIES PROFILE 88

*The difference between **"Profile 88"** and **Traditional** mouthpieces is in the exterior angle of the beak. The musician is free to choose the model which suits his purpose in terms of best playing position, easiest sound projection, greatest playing comfort, and the most controllable and precise articulation. The **"13 Series"** mouthpiece specifically for the American clarinetists using A440 pitch.*

VANDOREN LIGATURES/CAPS

The M|O ligature combines the lightweight construction of the legendary Masters ligature with the highly effective tightening of the OPTIMUM ligature.

Lightweight • Easy to set up • Quick and symetrical tightening with a unique double-track screw mechanism • Two small contact points only on the reed with an inverted tightening.

Thus the ***M|O*** ligature allows an optimum vibration of the reed and a crisp articulation.
